

Beating the Clock: An Unstoppable Force for Oil and Gas

Task & Details: Complex Challenge: Heavy-Lift, Oversized Cargo

When a major oil and gas leader needed to swiftly ship two gigantic 337-metric-ton umbilical reels, they turned to NMT Projects. Facing a narrow two-day window, we combined strategic partnerships and meticulous planning to make it happen.

The Challenge

Transport two colossal umbilical reels, each weighing up to 337 metric tons, from Le-Trait, France to the port of Rotterdam. The daunting requirement? Completing the loading within an extremely tight two-day timeframe.

Our Unstoppable Execution

Time was of the essence, so NMT Projects sprung into action with a meticulously coordinated plan. We leveraged strategic partnerships with trusted ship owners to secure a specialized vessel capable of handling the reels' immense size and weight.

Our engineering and compliance teams worked lockstep, ensuring every aspect met the highest standards. Communication across all parties – the client, vessel crew, and installation teams – was paramount to keeping operations on schedule.

The Results

Delivering a masterclass in complex logistics, NMT Projects executed a seamless, delay-free operation that achieved timely delivery within the narrow window – without any additional costs. We conquered tight deadlines through our unstoppable combination of expertise and precise oversight.

“The challenge was to find a vessel capable of shipping these large 337 metric ton reels and fulfilling the demand of a very short loading window.” – NMT Projects
